Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-2 are pending in the instant application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,846,785 to Patel.

Patel teaches liquid soap compositions comprising vitamins such as vitamin E acetate or vitamin C, in combination with anionic surfactants, chelating agent and acrylic polymer suspending agent. Instant claim 1 does not require the presence of components A and B (claims recite 0% to 8% or 0% to 14%). Examples 1-4 of Patel

Art Unit: 1615

recite the claimed alkyl polyglycoside, tocopheryl acetate (same as vitamin E acetate), water, anionic surfactants such as sodium laureth sulfate, glycerin etc. The examples do not include ethoxylated alkyl ether surfactants. However, Patel teaches several anionic surfactants that are suitable for the composition, including lauryl ether sulfates containing 1 to 2 moles ethylene oxide. According, it would have been obvious for one of an ordinary skill in the art at the time of the instant invention was made to employ sodium laureth sulfate or lauryl ether sulfates containing 1 to 2 moles ethylene oxide, as a suitable anionic surfactant in the soap compositions and still expect the same cleansing activity because Patel recognizes both the surfactants as equally efficient in their action.
